

Furniture Care

Furniture needs regular and proper care to maintain its beauty. The following recommendations, along with the use of our Guardsman Furniture Care Products, will help maintain the beauty and luster of original finish, as well as extend the life of your furniture

Sunlight

To limit the fading effects of ultra violet (UV) rays, furniture should not be placed in direct sunlight. Blinds, curtains and Guardsman UV furniture Polish help protect wood furniture for UV rays.

Humidity & Temperature

Extreme humidity may cause warping of joint failure in furniture and frames. Furniture should be placed in moderate temperatures (60° - 80°F) and moderate humidity (30% - 60% RH). To avoid damage, furniture should not be placed in attics, next to fireplaces or heating vents.

Accessories

Heavy accessories may cause distortion to the top of the furniture finish. Use cord or felt pads under accessories, not rubber or plastic. Lift objects rather than dragging them across the furniture surface. Rotate objects several times a year.

Place Settings

To limit damage to wood finishes replace vinyl and plastic tablecloths or place mats with linen. Cloth place mats should not be left on furniture for extended periods of time.

Reversible Cushions

To maintain the appearance of fabric and leather rotate removable. Reversible cushions routinely. Doing this will help maintain the appearance of the fabric and resiliency of the foam core.

Cleaning Recommendations

Follow manufactures cleaning recommendation. Use the proper cleaning products on your furniture. Pretest all products before using.

Wood

Wood furniture from Oak to Cherry requires routine care and attention.

- ✚ Dust weekly between polish applications
- ✚ Polish furniture monthly with wax free and silicone free Furniture Polish
